

Thiago Ferreira de Mello

24 Garlent Ave, ON L9K OJ9 | 226 339-0038 | thiagomello.td@gmail.com
<https://thiagofmello.github.io/> | <https://www.linkedin.com/in/thiago-ferreira-de-mello>

Dedicated Senior Technical Support Specialist and Systems Engineer with 15+ years of experience in enterprise infrastructure, cloud virtualization, and mission-critical support. Recognized as a CSAT Champion for three consecutive years at OpenText for consistently resolving complex technical issues for global clients.

Skilled in designing and maintaining resilient environments using containers and virtual machines, with strong expertise in network security, including VLAN segmentation, FortiGate firewalls, and disaster recovery planning. Experienced in automation scripting, VoIP systems, and server optimization across both Windows and Linux platforms.

Fluent in English, Portuguese, and Spanish, with a proven ability to lead, mentor, and collaborate in diverse, global teams.

EDUCATION

MBA in Strategic Management of Information Technology Universidade Castelo Branco	2019-2021
---	-----------

Bachelor of Information Systems Universidade Castelo Branco	2006-2011
---	-----------

CERTIFICATIONS

OpenText Certification: Content Server Administrator	2023
---	------

Microsoft Certified: Azure Fundamentals Microsoft N° I479-1395	2022
--	------

3CX Certified Engineer V14 certification (EN) 3CX N° Vzcpyh8GVv	2019
---	------

3CX Certified Engineer V16 certification (EN) 3CX N° ahtf486VpM	2016
---	------

Linux Certification Linux Professional Institute N° LPI000307884	2014
--	------

Microsoft Certified Professional, Microsoft N° 6718314	2009
--	------

Language Skills

- Portuguese: Mother Tongue.
- English: Fluent.
- Spanish: Advanced.

PROFESSIONAL EXPERIENCE

<u>Sr. Technical Support Specialist, at OpenText</u> Waterloo, ON, Canada.	<u>01/2022 – 12/2025</u>
--	---------------------------------

- **Top Performance & Recognition:** Recognized as a CSAT (Customer Satisfaction) Champion for three consecutive years (2022–2024), consistently maintaining high resolution rates for enterprise-level clients.
- **Subject Matter Expertise (SME):** Served as the primary technical point of contact for OTDS (OpenText Directory Services), Extended ECM Performance, and TeamSite LiveSite, resolving complex architectural bottlenecks.
- **Technical Problem Solving:** Utilized deep-dive log analysis and environment replication to identify, validate, and resolve high-priority software bugs.
- **Mentoring:** Led onboarding and technical training for new hires, providing hands-on mentorship to help them quickly integrate into the support environment.
- **Cross-Functional Collaboration:** Coordinated with product engineering and security teams to validate security reports and implement critical patches for client environments.

System Administrator, at Gentek

09/2021 – 12/2021

Burlington, ON, Canada.

- **Tier 2/3 Support:** Provided advanced technical support to end-users, resolving escalated hardware and software issues promptly.
- **Technical Documentation:** Audited existing records and authored comprehensive new technical documentation to standardize system configurations and support procedures.
- **Hardware Lifecycle:** Maintained and troubleshoot server room hardware to minimize downtime and ensure hardware reliability.
- **Software Deployment:** Spearheaded the implementation of new security and industry-specific software suites to improve operational efficiency.
- **Security & Vulnerability Assessment:** Actively monitored and enforced corporate security policies, identifying system vulnerabilities and implementing remediation patches.
- **Infrastructure Management:** Managed high-availability VMware environments alongside a diverse fleet of physical and virtual Windows and Linux servers.
- **Network Optimization:** Configured and optimized HP Switches, including the creation and management of VLANs to ensure efficient traffic flow and network security.

System Administrator and Team Manager, at BigFive

04/2014 – 05/2021

Rio de Janeiro, RJ, Brazil.

Key Technical Projects:

- **Cloud Infrastructure Architecture (Dot.Lib):** Engineered a highly scalable AWS cloud environment utilizing ECS for containerization and Auto Scaling to ensure application performance. Implemented a robust data strategy using S3, DynamoDB, and RDS, while optimizing content delivery through CloudFront and Route 53.
- **Enterprise Mail Migration & Connectivity (Katrium Chemical):** Led a critical migration from on-premises Zimbra to Microsoft 365, ensuring zero data loss for the organization. Designed and deployed a facility-wide Ubiquiti Wi-Fi network featuring a secure captive portal and VLAN segmentation for enhanced security.
- **High-Availability Virtualization (GPC Part):** Developed a resilient server infrastructure by implementing Hyper-V in a failover cluster, ensuring continuous uptime for mission-critical services. Maintained network integrity through the configuration of advanced VLANs on Cisco hardware.

- Unified Communications Deployment (JMN): Overhauled the corporate communication system by implementing a 3CX VoIP solution, significantly improving telephony reliability. Integrated the system with optimized HP switch configurations and dedicated VLANs for voice traffic.

Summary:

- Leadership & Team Growth: Directed a technical team of three, providing architectural guidance and mentorship to overcome complex project roadblocks.
- Infrastructure Strategy: Partnered with senior leadership to develop and execute long-term IT strategies, aligning technology goals with overall business performance.
- Enterprise Networking: Architected and managed large-scale networks using Cisco, HP, Dell, and Ubiquiti switches, implementing advanced VLAN segmentation to enhance security and prevent lateral virus spread.
- Virtualization & Server Management: Managed robust virtualized environments (Hyper-V, VMware, XenServer) and a diverse fleet of 20+ Windows and Linux servers, including Ubuntu, Red Hat, and CentOS.
- Security & Monitoring: Hardened infrastructure through the deployment of Zabbix monitoring and security tools including Snort IDS/IPS, pfSense, and FortiGate firewalls.
- Disaster Recovery: Implemented enterprise-grade backup and recovery solutions using Veeam and AWS Storage Gateway to ensure 24/7 data availability.
- Unified Communications: Architected and maintained enterprise VoIP systems using 3CX and Asterisk, managing seamless telecommunications for the entire organization, saving thousands of Reais per month.
- Infrastructure Monitoring: Deployed and configured Zabbix to provide real-time monitoring and alerting for all network systems, ensuring high availability and proactive issue resolution.
- Web Infrastructure: Implemented and optimized web services using NGINX and reverse proxies, improving security and load balancing for internal and external applications.
- Data & Storage Management: Managed high-performance storage environments using Dell EqualLogic and administered relational databases (PostgreSQL, MySQL) to support core business applications.
- Automation & Scripting: Leveraged strong scripting skills (Bash, PowerShell, Python) to automate repetitive administrative tasks and streamline system deployments.
- Strategic Leadership: Directed a technical team of three, providing architectural guidance and collaborating with senior management on long-term execution planning.

System Administrator at ADDLabs

04/2009 – 05/2014

Niteroi, RJ, Brazil

- Automation & Security: Developed custom PowerShell scripts to audit Windows Event Logs and enforce security restrictions via GPO, significantly hardening workstation security.
- DevOps & CI/CD: Spearheaded the implementation and maintenance of Jenkins CI/CD pipelines, streamlining the development lifecycle for internal teams.

- Infrastructure Management: Managed core network services including DHCP, DNS, FTP, and version control systems (CVS/SVN) across physical and virtual environments.
- Database Administration: Provided high-level administration for Oracle 11g RDBMS, ensuring data integrity and assisting developers with deep-dive debugging and code issue identification.
- Identity & Access: Managed enterprise user accounts and e-mail systems via Active Directory and MDAemon.
- Data Protection: Directed company-wide backup operations using Backup Exec with LTO tape technology to ensure long-term data retention.

Support Analyst at Repsol Sinopec Brasil

06/2011 – 08/2012

Botafogo, RJ, Brazil

- Software Deployment Excellence: Engineered a PowerShell-based deployment for specialized Geoscience applications, automating the rollout to the entire Geologist department.
- Leadership & Support: Led a technical support team providing high-tier assistance in Portuguese, English, and Spanish within a high-pressure global corporate environment.
- Workstation Management: Orchestrated the maintenance of Linux workstations and managed specialized software license servers.
- System Imaging: Streamlined desktop provisioning by creating and deploying standardized system images using Clonezilla.
- Active Directory Admin: Managed computer and user accounts within a Windows Server 2008 environment.

SKILLS & ABILITIES

Cloud & Virtualization

- Docker, Kubernetes (GKE/AWS/Azure), VMware, Hyper-V, Proxmox, XenServer, Rancher Desktop, AWS (EC2, S3, RDS, Route 53), Azure

Networking & Security

- Firewalls (FortiGate, pfSense), Cisco/Ubiquiti/HP/Dell L3 Switching, VLAN Isolation, VPN, IDS/IPS (Snort), Wireshark, TCPDUMP, NGINX Reverse Proxy

Systems & DevOps

- CI/CD (Jenkins), Infrastructure as Code (Terraform), Scripting (Bash, PowerShell, Python), Zabbix Monitoring, Linux (Ubuntu, RHEL, CentOS), Windows Server

Identity & Services

- SSO (SAML, OAuth2.0, SCIM), Active Directory, VoIP (3CX, Asterisk), Mail (M365, Exchange, Zimbra), Storage (Dell EqualLogic)

Databases

- PostgreSQL, MySQL, Oracle, SQL Server

Security & Continuity

- Disaster Recovery Planning, Veeam Backup, Backup Exec, Arcserve, Wireshark, TCPDUMP, IDS/IPS (Snort)
